

The Europe-wide framework for Earth-system modelling and climate service activities.

The integrated on-going and future European climate modelling, climate observations and climate service

The platform among relevant stakeholders, climate science communities, funding bodies, providers and users.

The multi-disciplinary expert groups to assess the state-of-the-art in Earth-system modelling and climate services in Europe, and identify existing gaps, new challenges and emerging needs

**THIS IS CLIMATEUROPE**

# PUBLICATIONS

Climateurope involves a vast range of experts and stakeholders, we map and analyze good practices, challenges and emerging needs in the European landscape of Earth System Modeling and Climate Services.

## Publications series

3 reports on the “state of European Earth System modeling and climate services”. For a wide readership including: scientific community, decision- and policy-makers from industry, professional and pub

## Reports

learned, recommendations, good practices in co-developing climate services between providers, the challenges encountered by continuous multi-stakeholder

## Policy Briefs

Key research findings collected in brief summaries that are condensed in a short format and composed with an easy-to-read language for a broad audience

## Articles

The advances in coordinating, integrating and supporting Europe’s research and innovation activities in the fields of Earth-System modeling and climate services. Climateurope activities published in peer-reviewed journals

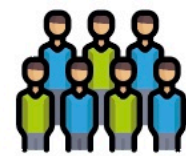

*Read our publications on* [www.climateurope.eu](http://www.climateurope.eu)

# CLIMATEUROPE FESTIVAL

Climate information at your service:

- Lectures, discussions, networking to explore the state-of-the-art of climate information, and its uses and value in decision-making.
- Synergies between different European, national and international initiatives in the fields of Earth-system modelling & Climate Services
- Dialogues, interactions, speed networking, cartoons, arts, videos, marketplace, presentations: **know more about the Festival on [www.climateurope.eu](http://www.climateurope.eu)**

Valencia 2017

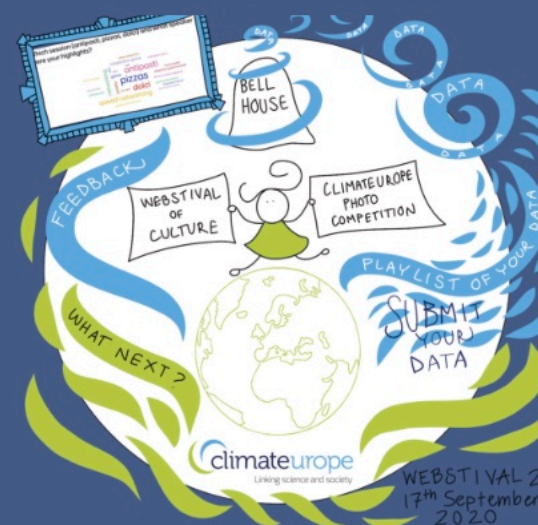

Belgrade 2018

**Webstival 2020**

a series of online events

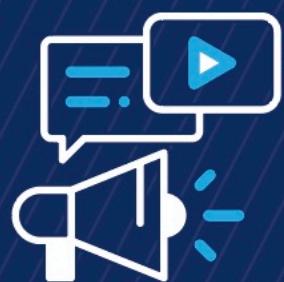

## WEBINARS

The experts focus on climate services and the link between science and society

//////////////////// ***Presentations, videos, Q&A are available online***

---

## STORIES

How and how much the collaboration between climate sciences and society can be fruitful, successful and challenging?

//////////////////// ***Have a look at the Climateurope stories***

---

## INITIATIVES

From the collaboration between institutions, research centers, framework programs, a list of what is going on in Europe at the crossroad of

//////////////////// ***Climate Observations, Earth System Models, Climate Services***

---
